DETAILED ACTION

Claims pending 1,4-1113-16,18-30.

Applicants have not cancelled the method claims 31-44.

The objection to claim 4 and 12 has been withdrawn since applicants have amended claim 4 and canceled claim 12.

The claims 16, 18-29 rejection under 35 USC 112 still stands since applicants arguments are not convincing. Applicants argue that the claim is read in light of the specifications.

Applicants definition of an aryl is a aromatic ring moncyclic or polycyclic ring.

Applicants claim 1 just states it is an aryl or an aryl(alkylene). It does not say it can be optionally substituted.

Thus the claim itself does not have any antecedent basis for the substitution.

The rejection of claims 1,2 and 4 (also included is claim 13) still under 35 USC 102 b over Mirek Julian 1971 45 (2) pages 205-9 still stands.

The reference discloses

See RN # 14178-43-9.

It reads on the compounds when n is 0 R2 is hydrogen and R3 is a phenyl.

Applicants proviso clearly states when is 0 and R3 is phenyl optionally substituted by methoxy, R1 cannot be selected from R5, when R5 is a hydrogen.

New Grounds of Rejection

Application/Control Number: 10/015,861

Art Unit: 1625

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

SCOPE OF ENABLEMENT

Claim1,5,6,8,17 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for R1 and R4 being aryl or alkyl, halogen, does not reasonably provide enablement for any heteroaryl, heterocycle aliphatic ring. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. The various groups for R1 and R4 are not enabled and would require an undue amount of experimentation to make and use them.

In re Wands, 858 F. 2d 731,737,8 USPQ2d 1400, 1404 (Fed. Cir. 1988). Ex Parte Forman, 230 USPQ 546 (Bd of App. 1986).

The presence of different groups which may be larger than the compound core itself would certainly have an effect on the various functional groups and oxide itself. This would require different solvents, protective groups, and steps to make and use them.

The breadth of the claims is too broad and the predictability in the art is very low, that one of average skill in the art would be able to make and use the compounds without any UNDUE experimentation.

The claims are still not allowable.

Application/Control Number: 10/015,861

Art Unit: 1625

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RITA J. DESAI whose telephone number is 703-305-1868. The examiner can normally be reached on Monday - Friday,9:30 am to 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alan Rotman can be reached on 703-308-4698. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-4556 for regular communications and 703-308-7922 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
